

Rexouium Jerry's Mod Face Tracking DLC by Adjerry91

Disclaimer:

- Patcher only works on the base model FBX, custom models will need the face tracking to be transferred.
- Face tracking setups are designed for base Unity packages use caution for existing project, Adjerry91 is not responsible for avatar damages

Import order:

1. Launch VRChat Creator Companion
2. Create new Avatar project
3. Add/Import VRCFury to your project <https://vrcfury.com/download>
4. Add/Import VRCFT - Jerry's Templates to your project <https://adjerry91.github.io/VRCFaceTracking-Templates/>
5. Add/Import Gogo Loco to your project <https://spokeek.github.io/goloco/>
6. Import any shaders need for the avatar (Follow Base Avatar Directions)
7. Import RexouiumUnity_VRC_V005.unitypackage
8. Import Rex_Jerry's_Mod_VRCFT_DLC_v2.2_by_Adjerry91.unitypackage
9. Run the following batch scripts in windows explore (Not in Unity) *Patcher visual guide shown below*
 - a. Rexouium_V261_fthrOptions (Rig1.2)_FaceTrackingPatcher.bat script in "/Assets/Rexouium/FBX_Rigs/Rig1.2 (Old Standard)"
 - b. RexouiumRig1.6_V265_Fthrs_ReparentChestUp_FaceTrackingPatcher.bat script in "/Assets/Rexouium/FBX_Rigs/Rig1.6 (HeadJntMovedUp)"
10. Open scene "Rex - Jerry's Mod" in "Assets/Rex - Jerry's Mod"

Version History:

- v1.0 - Original Release
- v1.1 - Fix OSCmooth on additive controller
- v2.0 - Update face tracking controls, 1.6Rig ReparentChestUp, updates to face tracking mesh
- v2.1 - Remove toe spread by default
- v2.2 - Update Cheek Puff and Face Tracking Prefab

Terms and Conditions:

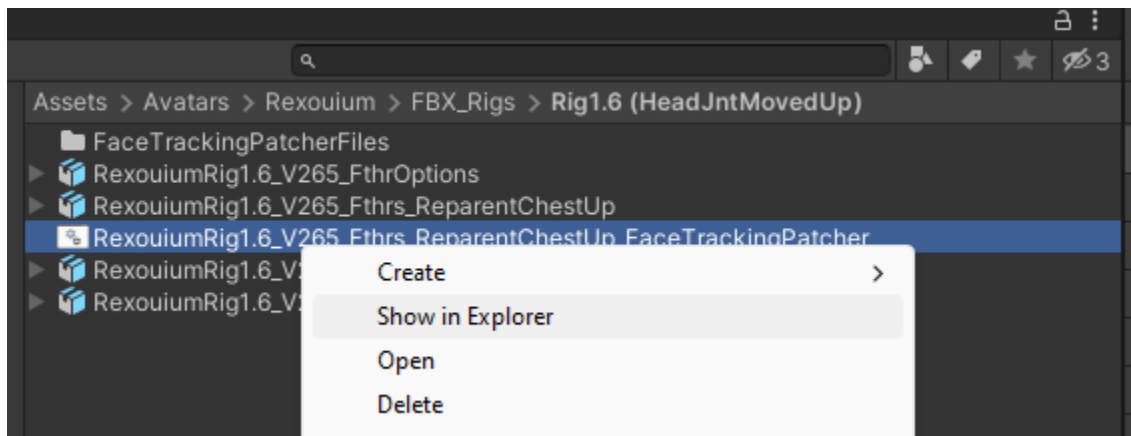

- Adjerry91 maintains the commercial rights to the face tracking setups, reselling or redistribution without Adjerry91's approval is prohibited.
- Adjerry91 face tracking uses VRCFT Templates as the basis <https://github.com/Adjerry91/VRCFaceTracking-Templates>. The templates are under MIT license, credit is required if parting out animation and controllers.

Support:
